CHRONOLOGICA

——The Unbelievable Years that Defined History

DID YOU KNOW...

In 105AD paper was invented in China?

When Columbus discovered the New World?

The British Museum opened in 1759?

CHRONOLOGICA is a fascinating journey through time, from the foundation of Rome to the creation of the internet. Along the way are tales of kings and queens, hot air balloons... and monkeys in space.

Travel through 100 of the most unbelievable years in world history and learn why being a Roman Emperor

wasn't always as good as it sounds, how the Hundred Years' War didn't actually last for 100 years and why Spencer Perceval holds a rather unfortunate record.

CHRONOLOGICA is an informative and entertaining tour into history, beautifully illustrated and full of fun

believable facts. While CHRONOLOGICA tells the stories of famous people in history such as Thomas Edison and Alexander the Great, this book also gives an account of the lives of lesser-known individuals including the explorer Mungo Park and sculptor Gutzon Borglum.

This complete but brief historical collection is certain to entertain readers young and old, and guarantee to present even the biggest history lover with something new!

56. What is CHRONOLOGICA according to the text?

- A. A biography. B. A travel guide.
C. A history book. D. A science fiction.

【答案】C

【解析】细节理解题。根据第四段“CHRONOLOGICA is an informative and entertaining tour into history, ... this book also gives an account of the lives of lesser-known individuals”可知，CHRONOLOGICA 是一本有关历史的书籍。

57. How does the writer recommend CHRONOLOGICA to readers?

- A. By giving details of its collection. B. By introducing some of its contents.
C. By telling stories at the beginning. D. By comparing it with other books.

【答案】B

【解析】考查写作手法。作者在文中以提问的方式提到很多与历史有关的人物或事件，像“from the foundation of Rome to the creation of the internet. ... tales of kings and queens, hot air balloons... and monkeys in space... why being a Roman Emperor wasn't always as good as it sounds, how the Hundred Years' War didn't actually last for 100 years and why Spencer Perceval holds a rather unfortunate record”，说明作者是在引用书中的内容；文章没有提及其它书籍，因此不是使用了对比手法。

B

Before birth, babies can tell the difference between cloud sounds and voices. They can even distinguish their mother's voice from that of a female stranger. But when it comes to embryonic learning (胎教), birds could rule the roost. As recently reported in The Auk: Ornithological Advances, some mother birds may teach their young to sing even before they hatch (孵)

化)。New-born chicks can then imitate their mom's call within a few days of entering the world.

This educational method was first observed in 2012 by Sonia Kleindorfer, a biologist at Flinders University in South Australia, and her colleagues. Female Australian superb fairywrens were found to repeat one sound over and over again while hatching their eggs, and when the eggs were hatched, the baby birds made the similar chirp to their mothers—a sound that served as their regular “feed me” call.

To find out if this special quality was more widespread in birds, the researchers sought the red-backed fairy wren, another species of Australian songbird. First they collected sound data from 67 nests in four sites in Queensland before and after hatching. Then they identified begging calls by analyzing the order and number of notes. A computer analysis blindly compared calls produced by mothers and chicks, ranking them by similarity.

It turns out that baby red-backed fairywrens also emerge chirping like their moms. And the more frequently mothers had called to their eggs, the more similar were the babies' begging calls. In addition, the team set up separate experiments that suggested that the baby birds that most closely imitated their mom's voice were rewarded with the most food.

This observation hints that effective embryonic learning could signal neurological (神经系统的) strengths of children to parents. A evolutionary inference can then be drawn. “As a parent, do you invest in quality children, or do you invest in children that are in need?” Kleindorfer asks. “Our results suggest that at they might be going for quality.”

58. The underlined phrase in Paragraph 1 means “”.

- A. be the worst B. be the best
- C. be the as bad D. be just as good

【答案】B

【解析】根据划线部分所在句子中的“but”可知，上下句是转折关系，婴儿虽然能辨别妈妈的声音，转而谈到胎教，根据第二段“when the eggs were hatched, the baby birds made the similar chirp to their mothers”可知，鸟儿在孵化小鸟时候的鸣叫对未出生的小鸟有很大影响，它们被孵化后也能发出类似的声音，说明鸟儿很擅长胎教。说明鸟儿在胎教方面的能力是很好的。

59. What are Kleindorfer's findings based on?

- A. Similarities between the calls of moms and chicks.
- B. The observation of fairywrens across Australia.
- C. The data collected from Queensland's locals.
- D. Controlled experiments on wrens and other birds.

【答案】A

【解析】根据第二段“”可知，研究发现是对澳大利亚两种会鸟鸣的鸟儿进行了记录，根据第三段“the researchers sought the red-backed fairywren, another species of Australian songbird.”可知，研究人员并未在全澳洲范围展开调查；未对其它鸟类进行记录研究，排除D项。根据倒数第三段

“A computer analysis blindly compared calls produced by mothers and chicks, ranking them by similarity.”可知，A项正确。

60. Embryonic learning helps mother birds to identify the baby birds which.

- A. can receive quality signals B. are in need of training
- C. fit the environment better D. make the loudest call

【答案】C

“the baby birds that most closely imitated the mother's voice were rewarded with the most food”和最后一段“Our results suggest that they might be going for quality.”可知，模仿母鸟模仿得最好的雏鸟得到最多的食物，研究结果表明，母亲会选择质量好的雏鸟、孩子。

C

A new commodity brings about a highly profitable, fast-growing industry, urging antitrust (反垄断) regulators to step in to check those who control its flow. A century ago, the source in question was oil. Now a similar concern is being raised by the giants (巨头) that deal in data, the oil of the digital age. The most valuable firms are Google, Amazon, Facebook and Microsoft. All look unstoppable.

Such situations have led to calls for the tech giants to be broken up. But size alone is not a crime. The giants' success has benefited consumers. Few want to live without search engines or a quick delivery. Far from charging consumers high prices, many of these services are free (users pay in effect by handing over yet more data). And the appearance of new-born giants suggests that newcomers can make waves, too.

But there is cause for concern. The internet has made data abundant, all-present and far more valuable, changing the nature of data and competition. Google initially used the data collected from users to target advertising better. But recently it has discovered that data can be turned into new services: translation and visual recognition, to be sold to other companies. Internet companies' control of data gives them enormous power. So they have a "God's eye view" of activities in their own markets and beyond.

This nature of data makes the antitrust measures of the past less useful. Breaking up firms like Google into five small ones would not stop them making themselves, in time, one of them would become great again. A rethink is required—and as a new approach starts to become apparent, two ideas stand out.

The first is that antitrust authorities need to move from the industrial age into the 21st century. When considering a merger (兼并), for example, they have traditionally used size to determine when to step in. They now need to take into account the extent of firms' data assets (资产) when assessing the impact of deals. The purchase price could also be a signal that an established company is buying a new-born threat. When this takes place, especially when a new-born company has no revenue to speak of, the regulators should raise red flags.

The second principle is to loosen the control that providers of on-line services have over data and give more to those who supply them. Companies could be forced to tell consumers what information they hold and how much money they make from it. Governments could order the sharing of certain kinds of data, with users' consent.

Restarting antitrust for the information age will not be easy. But if governments don't want a data economy by a few giants, they must act soon.

61. Why is the recall to breakup giants?

- A. They have controlled the data market
- B. They collect enormous private data
- C. They no longer provide free services
- D. They dismissed some new-born giants

【答案】A

【解析】第二段“Such situations have led to calls for the tech giants to be broken up.”中的such指代上文，根据第一段“urging antitrust (反垄断) regulators to step in to check those who control its flow.”可知，敦促反垄断管理者介入来调查控制数据市场的大公司。

62. What

doesthetechologicalinnovationinParagraph3indicate?

- A. Data giants' technology is very expensive.
- B. Google's idea is popular among data firms.
- C. Data can strengthen giants' controlling position.
- D. Data can be turned into new service or products.

【答案】C

“Internet companies' control of data gives them enormous power. So they have a “God's eye view” of activities in their own markets and beyond.”可知，互联网公司对数据的掌控使得它们拥有了很大的权力，说明数据会加强大公司的统治地位。

63. By paying attention to firms' data assets, antitrust regulators could.

- A. kill a new threat.
- B. avoid the size trap.
- C. favour bigger firms.
- D. charge higher prices.

【答案】B

“The first is that antitrust authorities need to move for m the industrial age into the 21st century. When considering a merger (兼并), for example, they have traditionally used size to determine when to step in. They now need to take into account the extent of firms' data assets (资产) when assessing the impact of deals.”可知，以前介入的标准是看公司的规模，而现在是把数据库的范围考虑在内。

64. What is the purpose of loosening the giants' control of data?

- A. Big companies could relieve data security pressure.
- B. Governments could relieve their financial pressure.
- C. Consumers could better protect their privacy.
- D. Small companies could get more opportunities.

【答案】D

【解析】根据倒数第二段

“Companies could be forced to consumers what information they hold and how many money they make from it.

Governments... with users' consent.”可知，由于大公司垄断数据信息，不利于小公司更好地服务消费者，也不利于政府开展工作。弱化这种垄断将会给小公司带去更多的发展机会。

Old Problem, New Approaches

While clean energy is increasingly used in our daily life, global warming will continue for some decades after CO2 emissions (排放) peak. So even if emission we retobegin decrease today, we would still face the challenge of adapting to climate. Here I will stress some smarter and more creative examples of climate adaptation.

When it comes to adaptation, it is important to understand that climate change is a process. We are therefore not talking about adapting to a new standard, but to a constantly shifting set of conditions. This is why in part at least the US National Climate Assessment says that: “there is no ‘one-size-fits-all’ adaptation.” Nevertheless, there are some actions that offer much and carry little risk or cost.

Around the world people are adapting in surprising ways, especially in some poor countries. Flood shaves

more damaging in Bangladesh in recent decades. Mohammed Rezwan saw opportunity where others saw only disaster. His not-for-profit organization runs 100 river boats that serve as floating libraries, schools, and health clinics, and are equipped with solar panels and other communication facilities. Rezwan is creating floating connectivity (连 体) to replace flooded roads and highways. But he is also working at a far more fundamental level: his staff people show how to make floating gardens and fish ponds prevent starvation during the wet season.

Around the world, people are adapting in surprising ways, especially in some poor countries. Floods have become more damaging in Bangladesh in recent decades. Mohammed Rezwan saw opportunity where others saw only disaster. His not-for-profit organization runs 100 river boats that serve as floating libraries, schools, and health clinics, and are equipped with solar panels and other communicating facilities. Rezwan is creating floating connectivity (连 接) to replace flooded roads and highways. But he is also working at a far more fundamental level: his staff show people how to make floating gardens and fish ponds prevent starvation during the wet season.

Elsewhere in Asia even more astonishing actions are being taken. Chewang Norphel lives in a mountainous region in India, where he is known as the Ice Man. The loss of glaciers (冰 川) there due to global warming represents an enormous threat to agriculture. Without the glaciers, water will arrive in the rivers at times when it can damage crops. Norphel's inspiration came from seeing the waste of water over winter, when it was not needed. He directed the wasted water into shallow basins where it froze, and was stored until the spring. His fields of ice supply perfectly timed irrigation (灌 溉) water. Having created nine such ice reserves, Norphel calculates that he has stored about 200,000 m³ of water. Climate change is a continuing process, so Norphel's ice reserves will not last forever. Warming will overtake them. But he is providing a few years during which the farmers will, perhaps, be able to find other means of adapting.

Increasing Earth's reflectiveness can cool the planet. In southern Spain the sudden increase of greenhouses (which reflect light back to space) has changed the warming trend locally, and actually cooled the region. While Spain as a whole is heating up quickly, temperatures near the greenhouses have decreased. This example should act as an inspiration for all cities. By painting buildings white, cities may slow down the warming process.

In Peru, local farmers around a mountain with a glacier that has already fallen victim to climate change have begun painting the entire mountain peak white in the hope that the added reflectiveness will restore the life-giving ice. The outcome is still far from clear. But the World Bank has included the projection of "100 ideas to save the planet".

More ordinary forms of adaptation are happening everywhere. A friend of mine owns an area of land in western Victoria. Over five generations the land has been too wet for cropping. But during the past decade declining rainfall has allowed him to plant highly profitable crops. Farmers in many countries are also adapting like this—either by growing new produce, or by growing the same things differently. This is common sense. But some suggestions for adapting are not. When the polluting industries argue that we've lost the battle to control carbon pollution and have no choice but to adapt, it's an absurd idea designed to make the case for business as usual.

Human beings will continue to adapt to the changing climate in both ordinary and astonishing ways. But the most sensible form of adaptation is surely to adapt our energy systems to emit less carbon pollution. After all, if we adapt in the way we may avoid the need to change in so many others.

65. The underlined part in Paragraph 2 implies.

A. adaptation is an ever-changing process

- B. the cost of adaptation varies with time
- C. global warming affects adaptation forms
- D. adaptation to climate change is challenging

【答案】A

【解析】one-size-fits-all 意为“通用的，万全之策”，句意：不存在通用的适应性方法。下句 Nevertheless 表转折，再根据“there are some actions that offer much and carry little risk or cost”可知，没有放之四海而皆准的方法，即适应是需要根据情况不断做出调整，而非一成不变的。

66. What is special with regard to Rezwan's project?
- A. The project receives government support.
 - B. Different organizations work with each other.
 - C. His organization makes the best of a bad situation.
 - D. The project connects flooded roads and highways.

【答案】C

【解析】根据第四段“Mohammed Rezwan saw opportunity where others saw only disaster.”可知，Rezwan 会从危机中看到机遇，会充分利用现有条件。

67. What did the Ice Man do to reduce the effect of global warming?

- A. Storing ice for future use.
- B. Protecting the glaciers from melting.
- C. Changing the irrigation time.
- D. Postponing the melting of the glaciers.

【答案】A

【解析】根据第五段“Norphet's inspiration came from seeing the waste of water over winter, when it was not needed. He directed the wasted water into shallow basins where it froze, and was stored until the spring.”可知，把冰川融化后的水储存起来以备不时之需，是减少气候变暖危害的方法之一。

68.

- What do we learn from the Peru example?
- A. White paint is usually safe for buildings.
 - B. The global warming trend cannot be stopped.
 - C. This country is heating up too quickly.
 - D. Sunlight reflection may relieve global warming.

【答案】D

【解析】根据倒数第四段“By painting buildings white, cities may slow down the warming process.”“painting the entire mountain peak white in the hope that the added reflectiveness will restore the life-giving ice”可知，将墙壁涂成白色是利用了光的反射原理，这样可以缓解气候变暖。

69. According to the author, polluting industries should.
- A. adapt to carbon pollution
 - B. plant highly profitable crops
 - C. leave carbon emissions alone
 - D. fight against carbon pollution

【答案】D

“When the polluting industries argue that we've lost the battle to control carbon pollution and have no choice but to adapt, it's nonsense”可知，作者不赞成“我们已经在与碳污染的斗争中失败了”这样的说法，说明作者建议污染企业行动起来。

70. What's the author's preferred solution to global warming?

- A. setting up a new standard.
- B. Reducing carbon emission.
- C. Adapting to climate change.
- D. Monitoring polluting industries.

【答案】B

【解析】根据最后一段

“ But the most sensible form of adaptation is surely to adapt our energy systems to emit less carbon pollution.”可知，作者认为，最合理的方法仍然是减少二氧化碳的排放。

第四部分：任务型阅读（共10小题；每小题1分，满分10分）

请阅读下面短文，并根据所读内容在文章后表格中的空格里填入一个最恰当的单词。

注意：请将答案写在答题卡上相应题号的横线上。每个空格只填一个单词。

Population Change

Why is the world's population growing? The answer is not what you might think. The reason for the explosion is not that people have been reproducing like rabbits, but that people have stopped dropping dead like flies. In 1900, people died at the average age of 30. By 2000 the average age was 65. But while increasing health was a typical feature of the 20th century, declining birth rate could be a defining one of the 21st.

Statistics show that the average number of births per woman has fallen from 4.9 in the early 1960s to 2.5 nowadays. Furthermore, around 50% of the world's population live in regions where the figure is now below the replacement level (i.e. 2.1 births per woman) and almost all developed nations are experiencing sub-replacement birth rate. You might think that developing nations would make up the loss (especially since 80% of the world's people now live in such nations), but you'd be wrong. Declining birth rate is a major problem in many developing regions too, which might cause catastrophic global shortages of workforce within a few decades.

A great decline in young workforce is likely to occur in China, for instance. What does it imply? First, China needs to undergo rapid economic development before a population decline hits the country. Second, if the factors such as technology remain constant, economic growth and material expectations will fall well below recent standards and this could invite trouble.

Russia is another country with population problems that could break its economic promise. Since 1992 the number of people dying has been bigger than that of those being born by a massive 50%. Indeed official figures suggest the country has shrunk by 5% since 1993 and people in Russia live a shorter life now than those in 1961. Why is this occurring? Nobody is quite sure, but poor diet and a long-time alcoholism have much to do with it. If current trends don't bend, Russia's population will be about the size of Yemen's by the year 2050.

In the north of India, the population is booming due to high birth rates, but in the south, where most economic development is taking place, birth rate is falling rapidly. In a further twist, birth rate is highest in poorly educated rural areas and lowest in highly educated urban areas. In total, 25% of India's working-age population has no education. In 2030, as sixth of the country's potential workforce could be totally uneducated.

One solution is obviously to import foreign workers via immigration. As for the USA, it is almost unique among developed nations in having a population that is expected to grow by 20% from 2010-2030. Moreover, the USA has a track record of successfully accepting immigrants. As a result it's likely to see a rise in the size of its working-age population and to witness strong economic growth over the long term.

答案】lower

【解析】根据“declining birth rate could be a defining one of the 21st”可知，21世纪的出生率比20世纪低，且 much/even/far/a lot/a little 等修饰比较级，故填 lower。

72.【答案】size/scale

【解析】根据第二段“almost all developed nations are experiencing sub-replacement birth rate”可知，发达国家人口出生率正在下降，即人口难以维持现有的规模，“maintain”一词是做题的依据，故填 size/scale。

73.【答案】immediate

第二段“which might cause catastrophic global shortages of workforce within a few decades”中的“within a few decades”可知，出生率的下降对发展中国家和全球的消极影响还没有发生，由此联想到“影响不是立即产生的”。

74. 【答案】economic

【解析】接下来几段分别讲了中国、俄罗斯、印度的人口与经济的问题，根据“economic development before a population decline hits the country”可知答案。

75. 【答案】old/older

【解析】根据“A great decline in young work force is likely to occur in China”可知，中国可能会迎来年轻劳动力的危机，故填 older。

76. 【答案】earlier

“the country has shrunk by 5% since 1993 and people in Russia live a shorter life now than those in 1961... but poor diet and above all long-time alcoholism have much to do with it”可知，俄罗斯人口由于缩短的寿命而急剧下降。

77. 【答案】living/life

【解析】如果俄罗斯人改变他们的生活方式，他们的情况可能会好一些。

78. 【答案】equality

“but in the south, where most economic development is taking place, birth rate is falling rapidly”可知，教育可以降低出生率，因此，可以通过普及教育来抑制人口增长。

79. 【答案】immigration

【解析】根据“One solution is obviously to import foreign workers via immigration.”可知，通过移民来引入外来工人是解决劳动力短缺的一种方法。

80. 【答案】compensate

【 解 析 】 根 据 “ Moreover, the USA has a track record of successfully accepting immigrants. As a result it's likely to see a rise in the size of its working-age population ”可知，美国的移民政策将会使劳动力有所增加。接纳移民可以弥补劳动力的短缺。

Possible version one

The box-office income of Chinese movies witnessed a constant increase from about 17 billion yuan in 2012 to over 40 billion in 2015. However, that increase slowed down in 2016.

The reasons behind this are various. The fast economic development before 2016 was probably the most powerful engine driving the constant growth in the box-office income. The application of new technologies and the wide appeal of movie stars could also account for the increase. However, China saw a decline in its economic growth rate last year. And the internet increase options for movie lovers. Consequently, some viewers began to turn away from cinemas, leading to a slower growth.

China's economy is expected to grow at a medium speed in the coming years, so an increase is possible in the investment in the movie industry and the number of quality movies. Therefore, its box-office income will probably enjoy a slight increase. (150 words)

Possible version two

As indicated in the graph, the box-office income of Chinese films increased constantly from 2012 to 2015,

but its growth for one reason or another slowed down in 2016.

The increase in the box-office income can be attributed to a number of factors. The quality of life has improved and watching films is regarded as a good means of entertainment. Besides, filming technology has advanced and more quality films are on offer. Moreover, the internet plays an important part. On the internet, people can seek information about their favorite stars and buy tickets at a discount as well, which is both time-saving and economical.

However, the film market may witness a slowdown in the near future. Cinema has gradually given way to the rise of the internet and cellphones, and the ticket price is on the increase. Therefore, the film industry should make greater efforts to attract more reviewers. (150 words)
